Career Summary

I have a history of working toward improving people's quality of life. I have recently applied that aim to the design and development of tools that create a better experience for businesses and individuals alike.

Professional Experience

Whim: UX/UI for MVP

Remote | July, 2021

Contributed to product architecture and UX processes for MVP via virtual group meetings. Created mid-fidelity wireframes for MVP in Adobe XD.

Light Sharp Corporation: Website Design

Remote | May, 2021

Transferred mid-fidelity design into Webflow for client. Added polish to design and ensured code was produced correctly.

The Biltmore Estate: UI Design Projects

Asheville, NC | November, 2020

Produced mid-fidelity wireframes for company's app redesign, and later for a new data collecting app to be used at entrance gates. Both projects in collaboration with their Corporate Technology Developer.

Founder of Home Made Housecleaning

Asheville, NC | 2019-2020

Owned and operated an all-natural house cleaning business using home-made (by me) cleaning products. Learned time- and self-management skills and became adept at problem-solving.

In-Home Care Aide

Asheville, NC | 2016 - 2018

Cared for elderly woman with Parkinson's disease and dementia until she died. Developed organization skills and gained empathetic communication skills.
