CareerFoundry | 2020

Professional Experience

UI Intern at Invade

Remote | July-August 2021

Designed social media posts and penetration testing report template for Invade, a start-up company in India that offered crowdsourced penetration testing services.

Whim: UX/UI for MVP

Remote | July 2021

Contributed to product architecture and UX processes for Whim's e-commerce start-up via virtual group meetings. Created mid-fidelity wireframes for MVP.

Light Sharp Corporation: Website Design

Remote | May 2021

Transferred mid-fidelity design into Webflow for client. Added polish to design and ensured code was produced correctly.

The Biltmore Estate: UI Design Projects

Asheville, NC | November 2020 & April 2021

Produced mid-fidelity wireframes for company's app redesign, and later for a new data collecting app to be used at entrance gates. Both projects in collaboration with their Corporate Technology Developer.

Website Design and Frontend Development

Remote | February-April 2021

Designed and wrote the HTML, CSS and minimal JavaScript for my portfolio website from scratch. This remains a work-in-progress. View using this link:
